Total			100

TITLE

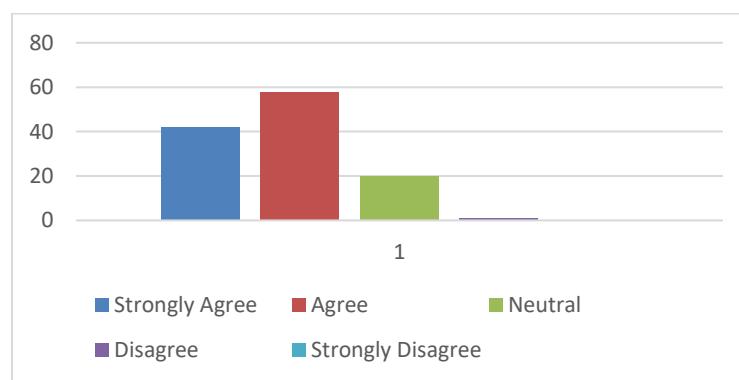

Figure 2.1.9

Interpretation

From the above table, it is known that 47.9% of the respondents agree that they are satisfied when goals are achieved, 34.7% of the respondents strongly agree that they are satisfied when goals are achieved, 16.5% of the respondents are neutral about their opinion and 0.8% of the respondents disagree that they are satisfied when goals are achieved.

2.2 STATISTICAL ANALYSIS

Sample Statistical Analysis

2.2.1 PEARSON CORRELATION ANALYSIS

2.2.1(A) To find the correlation between reuse and recommending others

Null hypothesis (H_0) There is no significant relationship between reuse and recommending to others

Alternative hypothesis (H_1) There is a significant relationship between reuse and recommending to others

Table 2.2.1(a) Correlation between relationship between reuse and recommending to others

	Reuse	Recommend
Reuse	1.000	0.763
Recommend	0.763	1.000
Sig (2 - tailed)		0.000

Inference

From the above table, it is inferred that significant value is less than 0.05.so H_0 is rejected. Therefore reuse and recommending to others have strong positive correlation with the value of 0.763.

Note: Statistical Analysis decision criteria: Significance value Less than 0.05 reject H_0 .
